**Journal of Fluid Mechanics Volume 532** **10 June 2005**

| | | |
|---|---|---|
| **J. L. Hammack, D. M. Henderson & H. Segur** | Progressive waves with persistent two-dimensional surface patterns in deep water | 1 |
| **A. Merle, D. Legendre & J. Magnaudet** | Forces on a high-Reynolds-number spherical bubble in a turbulent flow | 53 |
| **Y. Ma & X. Zhong** | Receptivity of a supersonic boundary layer over a flat plate. Part 3. Effects of different types of free-stream disturbances | 63 |
| **P. A. O'Gorman & D. I. Pullin** | Effect of Schmidt number on the velocity–scalar cospectrum in isotropic turbulence with a mean scalar gradient | 111 |
| **N. Nikitin & A. Yakhot** | Direct numerical simulation of turbulent flow in elliptical ducts | 141 |
| **P. Fife, T. Wei, J. Klewicki & P. McMurtry** | Stress gradient balance layers and scale hierarchies in wall-bounded turbulent flows | 165 |
| **V. N. Kurdyumov** | Far-field description of the flow produced by a source of both momentum and mass | 191 |
| **D. A. Donzis, K. R. Sreenivasan & P. K. Yeung** | Scalar dissipation rate and dissipative anomaly in isotropic turbulence | 199 |
| **T. M. Segin, B. S. Tilley & L. Kondic** | On undercompressive shocks and flooding in countercurrent two-layer flows | 217 |
| **E. Janiaud & F. Graner** | Foam in a two-dimensional Couette shear: a local measurement of bubble deformation | 243 |
| **A. Armanini, H. Capart, L. Fraccarollo & M. Larcher** | Rheological stratification in experimental free-surface flows of granular–liquid mixtures | 269 |
| **P. G. Daniels & M. Punpocha** | On the boundary-layer structure of cavity flow in a porous medium driven by differential heating | 321 |
| **C. D. Aubertine & J. K. Eaton** | Turbulence development in a non-equilbrium turbulent boundary layer with mild adverse pressure gradient | 345 |
| **R. Simitev & F. H. Busse** | Prandtl-number dependence of convection-driven dynamos in rotating spherical fluid shells | 365 |
| **I. P. Castro** | The stability of laminar symmetric separated wakes | 389 |
| INDEX TO VOLUME 532 | | 412 |
